

Weathertex Technical note

Installation of Weathertex product using Paslode framing gun.

The Paslode jolt head nail is approved for the installation of the following Weathertex products

- Weathergroove
- Selflok
- Primelok

For fixing patterns and nail placement for the Weathertex products refer to the Weathertex installation guide and follow the information for a ring shank nail.

www.weathertex.com/installation-manual-nz

Nail

Paslode Stainless steel JoltFast

- 65mm – Standard wall – 20mm Cavity batten and Weathertex
 - B20685 – Paslode Impulse 65x 2.87mm Jolt Fast Stainless Ring R-Head Nail (1000 pack)
- 75mm – Braced Wall – 10mm Rigid/ply brace, 20mm Cavity batten and Weathertex
 - B20683 – 75x 2.87mm Jolt Fast Stainless Ring R-Head Nail (1000 pack)

Application Gun

Paslode Frame Master

Frame master gun upgrades

1. Change driver pin to Jolt driver pin (404485M) – Installation through Paslode service agent – required to fire the smaller nail head.
2. Install No Mar (rubber) tip (B20544G)– required to prevent damage to the face of the Weathertex
